

Residual Biopolymer Test Kit

The StormKlear® Residual Biopolymer Test Kit uses proven test methods for detecting the presence of residual chitosan before it leaves the job site. This new patent-pending test kit improves accuracy by 25% compared to other kits. Results with the StormKlear Residual Biopolymer Test Kit are more consistent and reliable.

- Reliable, real-time results without the hassle of sending samples to outside labs
- Saves TIME and MONEY
- Gives contractors and regulators assurance against detrimental environmental impact
- Up to 100 field tests per kit
